

Technical Data Sheet

MODEL NO : Q776TNI4P-CY

2835 Package 2.8*3.5mm Chip LEDs

Features :

• Compatible with automatic placement equipment

• Compatible with reflow solder process

Applications:

Indicators

•Automotive : backlighting in dashboard and switch

•Backlight for LCD

| Dice material | Emitted color | Lens Color |
|---------------|---------------|-------------|
| AlGaInP | Red | Water Clear |

Electrical/Optical Characteristics(Ta=25°C)

| Parameter | Test | Symbol | Value | | | 11 |
|-------------------------|-----------|----------------|-------|------|------|------|
| | Condition | | Min | Тур | Max | Unit |
| Dominant wavelength | lf=150mA | λ dom | 620 | 625 | 630 | nm |
| Forward voltage | lf=150mA | Vf | 1.8 | | 2.6 | V |
| Luminous intensity | lf=150mA | lv | 4000 | 4500 | 5000 | mcd |
| Viewing angle at 50% Iv | lf=150mA | 2 <i>θ</i> 1/2 | | 120 | | Deg |
| Reverse current | Vr=5V | lr | | | 10 | μΑ |

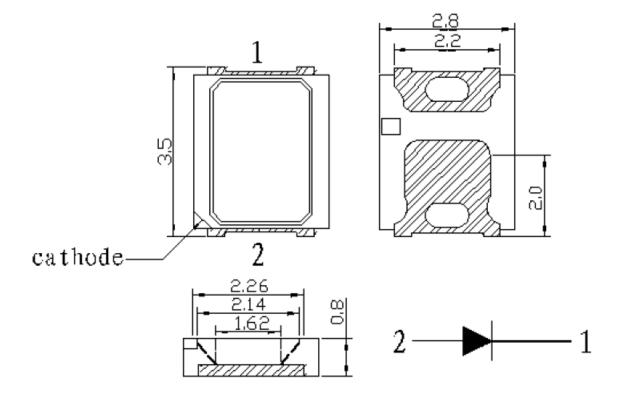

Absolute Maximum Ratings(Ta=25°C)

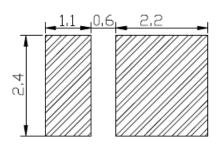

| Parameter | Symbol | Value | Unit |
|--|--------|----------|------|
| Power dissipation | Pd | 380 | mW |
| Forward current | lf | 150 | mA |
| Reverse voltage | Vr | 5 | V |
| Operating temperature range | Тор | -40 ~+80 | °C |
| Storage temperature range | Tstg | -40 ~+80 | °C |
| Peak pulsing current (1/8 duty f=1kHz) | lfp | 200 | mA |

2016JUL06Y

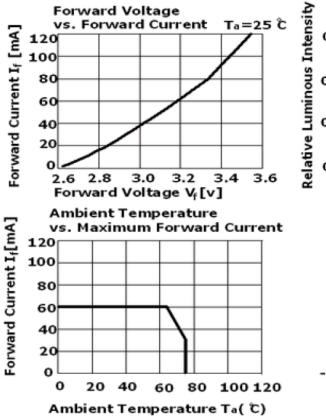

PACKAGING DIMENSIONS

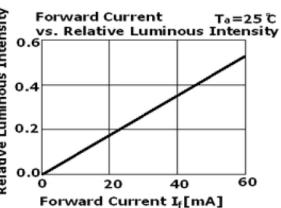

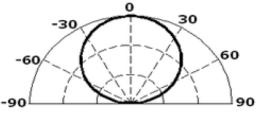

Typical Electro-Optical Characteristics Curve:

Luminous Intensity Distribution

Precautions For Use :

Over - current - proof

Customer must apply resistors for protection, otherwise slight voltage shift will cause big current change (Burn out will happen)

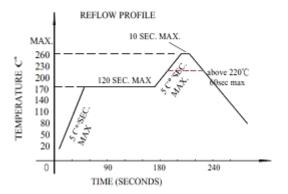

Storage

1. The operation of temperature and R.H. are $: 5^{\circ}$ C $\sim 30^{\circ}$ C, 60° R.H. Max.

- 2. Once the package is opened, the products should be used within a week. Otherwise, they should be kept in a dampproof box with desiccating regent. Considering the tape life, we suggest our customers to use our products within 1.5 year (from production date).
- 3. It's recommended to bake before soldering when the package is unsealed after 72 hrs. The condition is : 60°C±5°C for 15hrs.

■ Reflow Temp/Time

Temperature-profile (Surface of circuit board) Use the following conditions shown in the figure.

NOTES:

- 1. We recommend the reflow temperature $245^{\circ}C(\pm 5^{\circ}C)$.the maximum soldering temperature should be limited to $260^{\circ}C$.
- 2. dont cause stress to the epoxy resin while it is exposed to high temperature.
- 3. Number of reflow process shall be 2 times or less.

■Soldering iron

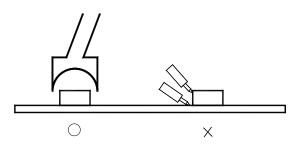

Basic spec is \leq 5sec when 260°C. If temperature is higher, time should be shorter

 $(+10^{\circ}C \rightarrow -1 \text{sec})$. Power dissipation of iron should be smaller than 20W, and temperatures should be controllable .Surface temperature of the device should be under $230^{\circ}C$.

Rework

- 1. Customer must finish rework within 5 sec under 260° C.
- 2. The head of iron can not touch copper foil
- 3. Twin-head type is preferred.

- - Tape Specifications (装带规格)
